

## TACIT ARCHITECTURE REASONING

### whiteboard intent

goals, risks, tradeoffs

### models + sheets

cost, latency, energy

### natural specs

requirements, rationale

## REPRESENTED DESIGN-LOOP LAYER

### loop contract

intent + legal choices

### representation

design state + roles

### environment

actions + feedback

### evidence ledger

provenance + rejection

simulators / models

compiler / runtime

RTL / generators

EDA / signoff

feedback

the missing layer is a reviewable loop contract, not extra documentation
