

ARCHITECTURE QUESTION AND JUDGMENT

design intent
goals, risks, tradeoffs

architecture models
cost, latency, energy

requirements + rationale
scope, constraints, stakes

BOUNDED ARCHITECTURE STUDY

study scope

question + intended decision

architectural claim

under review

execution + analysis mechanism

design loop when work iterates

evidence + review

accountable decision rights

revise claim or study

TOOL PATH

simulators / models

compiler / runtime

RTL / generators

EDA / signoff

measurements return

bounded finding or architectural decision
