

Conformance levels

each level requires all fields below it

Level 3, independence and decision

adds rejection gates, independent authority,
commitment boundary, accountable owner

Level 2, replay bindings

adds workload, seed, and tool-version IDs,
parameter digest, replay source URI

Level 1, inspectable study bindings

adds representation, environment, actor map,
feedback budget, baseline evidence, negative traces

Level 0, context only

card ID, conformance level, intent, task,
design-space boundaries

One card, judged per level

illustrative card with one missing binding

Level 3 fields all present

cannot lift the card above the gap below

Level 2, one required binding missing

tool version not recorded

conformance caps at Level 1

Level 1 fields all present

Level 0 fields all present

A missing required field caps the whole card at the highest level whose required fields are all present.
