

TACIT ARCHITECTURE REASONING

whiteboard intent

goals, risks, tradeoffs

models + sheets

cost, latency, energy

natural specs

requirements, rationale

REPRESENTED DESIGN-LOOP LAYER

loop contract

intent + legal choices

representation

design state + roles

environment

actions + feedback

evidence ledger

provenance + rejection

simulators / models

compiler / runtime

RTL / generators

EDA / signoff

feedback

the missing layer is a reviewable loop contract, not extra documentation
