

The "Silicon ADMET" Funnel

Parallels between Drug Discovery and Architecture Verification

Drug Discovery (ADMET)

In-silico Screening
(10,000+ candidates)

In-vitro Testing
(Toxicity, Binding)

Clinical Trials

Isomorphic

Filters

Silicon Design

Fast ISA Simulators
(High-level performance proxy)

RTL & Logic Synth
(Power, Thermal, Area limits)

Physical Signoff

Goal: Weed out decoys before expensive stages
